

LATERAL FLOW TEST

In this video Denise Heard, QKA School Nurse, talks through the Lateral Flow Test.

It is important to point out: -

It doesn't hurt, so you shouldn't worry

It takes less than two minutes

It's a very simple procedure

You will be supported and taken care of by QKA staff

The process

- Enter the theatre,
 - You'll be shown to a cubicle
 - Everything you will need to carry out the test is in the cubicle.
 - Sanitise hands.
 - Open the swab packet and carefully remove the swab
 - Swab tonsils 4x on each side
 - Swab 1x nostril
 - Turn upside down, and place in the tube provided
 - Sanitise hands.
- ✓ DONE – you may now leave and will receive your result in 30 mins

If you have not yet consented, the link to do so is here:
